

SCRATCH

Pathway – Level 1

Introduction to Scratch: Sprites, scripts, and loops

In this introduction to coding in Scratch for beginners, you will learn how to add code, costumes, and sounds to sprites as you make animations, a game, an app, and a book.

Explore

Get new skills

Space talk

Use Scratch to give sprites an 'emote' so that they communicate when clicked

Catch the bus

Code sprites to walk or fly to the bus before it drives off

Find the bug

Create a game in which you have to find a hidden bug on each level

Design

Make design decisions

Silly eyes

Create your own app with a character whose eyes follow the mouse pointer

Surprise! animation

Create an animation of a story with a surprise

Invent

Create a unique solution

I made you a book

Create a book with multiple pages to tell a story or share facts
